AtlasWise
The world at your fingertips.

EDUCATOR PARTNERSHIP PROGRAMME

FOR LECTURERS IN ANY SUBJECT · COLLEGES · POLYTECHNICS · UNIVERSITIES

Timed online tests on your students' phones. Marked for you.

Questions built from your own course outline, for any course from NCE and ND to degree level. Students sit the test in class, every script is marked the moment it is submitted, and you download the scores in Excel. No more marking 200 scripts by hand, and free for every student.

In the classroom

Tests on their phones

Students open one short link, enter their name, reg no and level, and start. No app to install.

Timed and auto-marked

The timer runs on its own and submits when time is up. Scores are ready instantly.

Fair by design

Shuffled questions and options for each student, an access code, one attempt per reg no, and every exit from the page recorded.

What you get as a lecturer

- **Scores in Excel.** Name, reg no, level, score and time taken for the whole class, downloaded in one click.
- **Questions from your outline.** We write the question bank and you approve every question before students see it.
- **Your own dashboard.** Open and close tests, watch submissions arrive live and see the questions most students missed.
- **Credit and royalties.** A named contributor profile, a partnership certificate, and a share of sales from question packs you co-author.

How a free pilot works

1 **Share** the course title, level and outline.

2 **We build** the questions; you approve them.

3 **Open** the test and write the link on the board.

4 **Download** the scores in Excel after class.

No student fees, ever · Minimal student data · Your content credited · Leave any time

ABOUT ATLASWISE

Founded by Cornelius C. Okechukwu, Senior Lecturer and Head of Department in Computer Engineering, with 17 years of teaching and curriculum development.
